

## NURSERY SCHOOL AND PRIMARY SCHOOL

**Whether it's because of poor maintenance, a lack of funds or environmental conditions, schools in every corner of the country have areas of land that are unusable. As well as creating eyesores, these damaged, neglected areas restrict the amount of space that children have to play in.**

### THE CHALLENGE

- With 90% of schools losing playing fields to building works, there is more pressure to create useful, safe and fun play areas than ever before

### THE SOLUTION

- ✓ An ideal alternative for those with allergies, not only is artificial grass more attractive than concrete, tarmac or wood chip, it is also more practical.
- ✓ Allowing children to play outside in all weathers, the mud free surface helps to keep uniforms clean and parents happy.
- ✓ What's more, as artificial grass is softer than concrete and tarmac, it helps to prevent injuries and provides a safe and natural looking play area for children of all ages to enjoy.
- ✓ Every pupil can get involved by walking, jogging or running around their Golden Mile track within the safety of the school grounds. A perfect surface for a Golden Mile track is rubber mulch. Installed in a variety of colours it provides a long lasting solution enabling children of all abilities to improve their fitness.
- ✓ Most schools in the UK have at least one section of their playground that's overgrown with weeds, tired, dark or covered in cold, hard concrete. However, with a little bit of investment, these unusable areas can be transformed into useful, safe, attractive and practical spaces.

### INSTALLATIONS

- Football at Home
- Hockey at Home
- Golf at Home
- Tennis Courts
- Grass Install
- Boarders & Planting
- Fencing
- Lighting
- Play Areas

### SERVICES

- Regular Maintenance
- Repairs
- Chemical Treatment
- Deep Clean
- Pressure Washing
- Resurfacing
- Rebinding
- Part/Full Surface Rejuvenation
- Infill replacement
